

Dashboard Overview: India's Yearly Electricity Consumption

The dashboard offers an in-depth analysis of India's electricity consumption, presenting trends in Electricity Sales and EPS 19 Projections (BU), category-wise breakdowns, and state-wise variations. It highlights key insights, including percentage contributions, state-level differences, and comparisons between these two primary metrics. Key highlights of the dashboard include:

1. Yearly Trend

- **Year-wise Electricity Sales vs EPS 19 Projection (BU):** Illustrates annual trends for both electricity sales and EPS 19 projections in billion units.

2. Breakdown by Category

- **Category-wise EPS 19 Projections (%):** Presents a percentage-based distribution of EPS 19 projections across various categories (e.g., domestic, industrial, commercial etc.).
- **Category-wise Electricity Sales (%):** Presents a percentage-based distribution of electricity sales across various categories (e.g., domestic, industrial, commercial etc.).

3. State Wise Insights

- **State-wise Deviation (%):** Visualizes the percentage change between Electricity Sales and EPS 19 projections.
